

CS10-CM03 – Doctor call button

The doctor call button CS10-CM03 can be placed next to beds or in another position in the rooms. Calls executed by this button are considered alarm calls. When this button is pressed, the LED indicator is switched on with a blue colour to inform the healthcare staff that the call has been recognized by the system. The call button has a finder light to help the healthcare professional to locate the button in the dark.

The CS10-CM03 is a standard 45x45 modular device with a single blue colour capacitive call button.

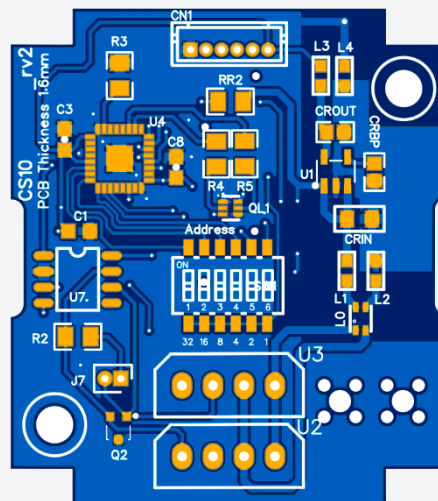

Ref. 9801100080000

CHARACTERISTICS:

Electrical characteristics:	
Service voltage	12 Vdc
Power consumption	0.25W @ 12V
Operating frequencies	
CPU	8 MHz
Interfaces	
CAN Bus 2 – Zone bus	Yes
General characteristics	
Width	45 mm
Height	45 mm
Depth	30 mm
Material (modular piece)	ABS V0
Material (faceplate)	2mm Clear Acrylic
IP degree	IP20

CONNECTIONS:

Connectors		
Number of terminals		8
Terminal type		Plug-in
Wire dimension		24 AWG a 12 AWG
Terminal	Pin No.	Description
U2 – CAN LS (zone bus)	1	CANH
	2	CANL
	3	GND
	4	+12V
U3 – CAN LS (zone bus)	5	CANH
	6	CANL
	7	GND
	8	+12V
